Tony Nicholas' Body Recovered

Vince Rezitka Discovers Body
While Fishing--Four Miles
Below Falls--Funeral
Held Tuesday

Exactly three weeks following the fatality at Lundbreck Falls, when Gladys Knowles and Tony Nicholas lost their lives, the body of the latter was recovered on Saturday afternoon at a spot approximately four miles below Lundbreck Falls, lying partly submerged and caught in some roots beneath the surface. Vince Rezitka of Frank, had been fishing along the river, and keeping an eye out for the body, discovered it during the afternoon. Two other men engaged on the same mission had passed the spot earlier in the day but failed to see it.

Rezitka immediately towed the body to shore and went to Lundbreck to notify the police and the coroner at Blairmore, who arrived on the scene shortly after, and Mr. Nicholas, father of Tony, also went there. A. E. Ferguson, of the Crow's Nest Undertaking Co., later removed the body to Coleman funeral parlor, where it was prepared for burial.

Rezitka, it is reported, claims the \$400 reward offered by Mr. Nicholas for the recovery of the body.

The funeral was held on Tuesday and the Holy Ghost church was filled with friends and acquaintances of the family. The Rev. Fr. Lahman, parish priest, and the Rev. Fr. Donovan, of Bellevue, officiated. The pall bearers were J. Fraser, G. H. Homan, V. Janostek, Angelo Oliver, Joseph Oliver, B. Fontana.

The deceased was 19 years and 6 months old, and was born in Fernie, B.C. The family moving to Coleman about 15 years ago. Since then he had attended school here and later assisted his father in his dry goods store. During last winter he was an enthusiastic worker for the hockey club, always being ready to turn out and drive the boys to matches in the Pass towns, or assist at the local rink. As a

A Trip Through Canada's Inland Ocean

1. View of Manitoulin Island from aboard ship.
2. S.S. ASSINIBOIA passing through Sault Ste. Marie locks which connect Lakes Huron and Superior.
3. Deck scene on S.S. KEWATIN on Lake Superior.

The Great Lakes--Canada's inland ocean--opened to navigation last month, are just entering on their summer condition of offering one of the major attractions of the Dominion to tourists. Vistas of beautiful islands and frowning headlands present some of the most beautiful scenery on the North American continent, while the illusion of sea travel is given to passengers when for a full day at least nothing but water is visible from the ship. Canadian Pacific ships, traversing their waters weekly, supply every up-to-date comfort and facility to travelers and remarkable engineering works add to the list of sights and beauties which nature gives in profusion.

Often you say "some day I'll take an ocean voyage," but did you ever stop to think that next door to you is an inland ocean where for two glorious days aboard a Canadian Pacific ship you can enjoy your long-dreamed-of voyage? If you haven't, the chance lies open to you and you can take the delightful cruise across Huron's blue waters, through the lovely St. Mary's River and away over the broad

expanse of Lake Superior, the largest body of fresh water in the world.

You can take it as a trip in itself or you can take it as a break in your rail journey across the continent. It carries you from Port McNicoll to the Head of the Lakes at the Twin Cities. The great white ships of the Canadian Pacific speed along with all the swift grace of gulls that circle and dip at the mast heads or perch and flutter above the deck rails. Perfection of service adds a last pleasing touch to the meals, the comfort of the staterooms and the social affairs on deck and below.

Since the level of Lake Superior is 21 feet higher than that of Lake Huron the Sault Ste. Marie lock has been constructed and the Canadian Ship Canal to join up the two lakes. This remarkable engineering work is one of the sights of the voyage. Three fine ships make the trip weekly for the Canadian Pacific, the "Kewatin," the "Manitoba," and the "Manitou," two from Port McNicoll and one from Owen Sound, with the same number of eastward sailings from the Twin Cities.

No Truth to Rumor

A person stated to The Journal that it was stated around Carbonade that when the alarm was telephoned in the right of the fire at the D'Appolonia house there that it was not answered at the fire hall and that someone had to rush down town. Investigation proves the rumor to be without foundation, as Constable Houghton was in the hall and the person who phoned in did not give the location of the fire. The fire equipment was rushed to the place immediately and owing to the location of the building it was impossible to obtain sufficient pressure to do effective work. No person was in the house when the fire started, and it had a good hold when discovered by A. B. Westworth, whose house was in danger and who took the precaution of removing the contents of his house.

Going to British Columbia

A well known popular couple who are leaving Coleman after several years residence are Mr. and Mrs. J. S. Rogers, of Fifth Street. They will make their home in the beautiful Arrow Lakes district of British Columbia, though for the present they will stay with a son near Nelson, till they settle in their new home.

On Friday evening Mr. Rogers was honored by the Elks Lodge in the presentation of a handsome case of pipes, with an address by Thos. Johnson. He left on Monday morning, and Mrs. Rogers intends to leave about July 1. The hearty good wishes of many friends in Coleman will follow them to their new home in British Columbia.

Mr. John Houghton is improving his residence property by leveling the front and putting in a cement retaining wall.

Jessey-Jenkins Wedding

Knox United church, Calgary, was the scene of a quiet and pretty wedding on Wednesday afternoon, June 5 when Mary G., the eldest daughter of Robert Jenkins, of Coleman, became the bride of David W. Jessey, youngest son of Mrs. C. Jessey, of Langdon.

The bride was given away by her father, and was charmingly attired in oriental olive with molair hat to match. The bridesmaid was Miss Margaret Groat of Coleman.

The bridegroom was attended by his brother, Harry Jessey. Rev. George A. Dickson officiated. A luncheon was served at the Tea Kettle Inn, at which the immediate friends were present.

Mr. and Mrs. Jessey left by motor for a short sojourn at Banff, and upon their return will be of home to their friends at Seebe, Alberta.

Fined for Operating Gaming House

Last Friday before Magistrate Gresham here, W. Allan was fined \$150 and costs on the charge of running a gaming house, and four of the frequenters who were caught there on the night of June 8, were each fined \$15 and costs. The premises raided have been operated as a club for a considerable time.

Mr. and Mrs. G. Duffield have moved to Sixth street, taking the house formerly occupied by the Halliwell family, the latter having taken over the J. S. Rogers cottage on Fifth street.

"House or Hovel--Which?" Attention is called by C. J. Tompkins, local agent for Sun Life, to the display advt. with the above title, on page 4 of this issue. Look it up, it's of vital interest!

Rod & Gun Club Outings

The executive of the Rod & Gun Club met last evening and the dates of the competitions were set for July 14, at South Fork Bridge, August 4, at North Fork, and Aug. 25, at South Fork. The prize list for the competitions will be arranged shortly, and all entrants in each competition must pay a fee of 50c to the secretary, Chas. Makin, prior to the date of each competition.

Local News

Wilfrid Dutil went to Spokane yesterday by car to attend a wholesale and retail buyers convention. Accompanying him was Leslie Emerson, and they will absorb the atmosphere and enjoy the hustle and bustle of the western city for a few days.

Your chances are good for winning a handsome Chesterfield Suite valued at \$375, or an Electric Orthophonic valued at \$155, if you purchase a ticket for the community carnival at 25c. Books of tickets containing 20 are sold at \$4.50 and may be obtained at The Journal office or from H. C. McBurney, or individual tickets from ticket sellers.

Recently St. Alban's branch of the J.W.A. held a Mother and daughter banquet. About sixty were present and a very interesting and entertaining time was spent, the daughters putting on quite a clever entertainment for their mothers. One of the interesting novelties was the display of Doan's work made by the children. This consisted of 18 dressed dolls, 7 knitted scarves, 9 finger coverings, soap, comb and face cloth. The same has been forwarded to the Diocesan Doan's secretary, Calgary and from there they will be forwarded to the missions where they are most needed.

Local News

With the increasing number of car accidents, the railroads and the airways are far safer for travel.

A denizen of West Coleman who has caused considerable trouble to himself and the police, has been placed on the interdicted list, in order to find if it will cause him to appear in court less frequently.

J. S. D'Appolonia is a bird of passage these days. He makes a flit of over 600 miles to South Saskatchewan in one day, stays a while to see that all is going well on his building contract for the Bank of Commerce at Willow Bunch, then overnight he appears back in Coleman to check over things in general. There is nothing like variety to give spice to life.

Martin Balak, timber packer at McGillivray mine, and Pete Sharp, driver boss, were injured last week and admitted to hospital. Balak is still in hospital, with an injured knee, while Sharp was able to proceed home after having several stitches put into a bad gash in his head.

NOTICE!

Parents whose children will be entering the primary classes next term (September) are requested to register their children during the last week of this school term. Mrs. Clifford at the Central School and Miss Dunlop at West Coleman will be pleased to meet the parents during the week June 24 to 27. In the afternoons.

New pupils must be six years of age. If possible, please bring with you a possible accommodation in a new school. The possible limit will be extended later.

Some proof of age should be submitted if at all possible at the time of registering.

Automobile Accidents

The summer months of July and August undoubtedly witness the heaviest automobile traffic throughout Western Canada. It is during this period that tourist traffic is greatest with foreign cars in large numbers from other provinces and the United States crossing and re-crossing these prairies. They come from Provinces and States where traffic regulations frequently are different from those in force in these Western Provinces. During this mid-summer period, too, what we may term “domestic” traffic is at its peak. Roads are at their best, and following the closing of the schools many of our people tour “en famille,” while week-end journeyings to summer resorts are much in vogue.

While cars in driving is at all times necessary, and with the steady increase in the number of cars in use is becoming a more and more vital matter, it is nevertheless the case that during these summer months extra care should be taken.

There are certain factors to which special attention should be paid, and the importance of which are reinforced as a result of careful investigations into the cause of auto accidents carried out during a period of years. For example, one would naturally suppose that the majority of such accidents occur on bad roads, at intersections, curves, etc., but statistics prove that the majority of accidents occur on the so-called “safe” parts of the highways. Apparently drivers are careful on curves and badly surfaced roads, and let themselves go on straight, smooth stretches.

Statistics compiled in the State of Iowa in regard to accidents are certainly illuminating: 10,666 accidents occurred on straight-away stretches where the drivers of the colliding cars had a clear view of the objects with which they were colliding.

7,390 occurred at intersecting roads, most of which were due to the fact that one or both vehicles approached the intersections at speeds too great to be checked upon perceiving the approach of the second car.

3,566 were caused by failure to grant the right-of-way at street crossings.

940 occurred on curves, caused by the drivers of the two vehicles going in opposite directions “hugging” the “inside” of the bend in the road to help them maintain high speed.

1,169 resulted from driving on the wrong side of the road.

117 were caused by cutting corners.

1,788 were caused while ascending and descending hills.

The roads were in the following condition: 15,000 roads were good; 563 were rough; 3,196 were wet; 483 were covered with snow; 1,018 were icy; 186 were sandy; 51 were muddy.

These figures seem to fairly establish the fact that the better the roads, the greater the number of accidents. In other words, where roads are not good, drivers are forced to exercise care, and because care is exercised accidents are reduced to a minimum notwithstanding that conditions existing would naturally predispose accidents, but where roads are good drivers become careless, even reckless, and sooner or later, the inevitable result is an accident.

With the present insistent demand everywhere for more good roads, and a still higher standard of good roads, coupled with the increasing power of cars and their enormous increase in number, the accident toll on highways is mounting higher and higher. The cause is the very reverse of what might have been expected. It is not defects in car manufacture, because cars themselves are stronger than ever before. It is not road conditions which presumably might ditch a car, overturn or damage it.

No, it is the human element that is responsible for the mounting toll of accidents. Instead of reaping the benefit of the vast improvements being made, drivers are becoming more and more careless, taking ever greater chances, becoming less considerate of the other fellow's rights, determined to secure “speed” at all hazards.

Think it over the next time you are tempted to “step on the gas” for the sole purpose of seeing and boasting of what your car can do. It may do something you least desire and will forever regret.

Help Yourself

Help yourself and the world will not treat you very badly. Helping yourself means thinking, improving your job, and having other interests as well. It further means cultivating your brains by reading and learning something new. You will find plenty to occupy your time and thoughts, and thus you will never feel bored or dull.

Busy At Eighty-Two

At the death of 82, of Mrs. Flora Annie Steel, the great novelist of India, at Springfield, England, recently, she had just finished a novel, and had just published another, “The Curse Of Eve,” which gave her views on social problems.

When Pain Comes

What many people call indigestion is really excess acid in the stomach. The stomach nerves being over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

effortless alkali in water will neutralize instantly many times as much excess acid as the symptoms disappear. You will never use crude medicine when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Work On Branch Line To Mine

Commence Laying Steel On Line To Sherri-Gordon Property

Commencement has been made on the laying of steel on the branch from Cranberry Portage to Sherri-Gordon.

According to information, a very large gang under Peter MacKenzie, started laying the rails on the 5½ mile stretch. Work will be rushed on the steel laying and it is anticipated that trains will be running into Cold Lake by September 1st.

The opening up of the Cold Lake branch will see active development on many mining properties lying between Cranberry and Cold Lake.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nerve system. Men and women, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault.

The poor health is the cause. The tired, over-worked wife and mother, whose household cares have worn her thin; the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how her nervous condition ended her nervous troubles. She says: “I have suffered from nervousness and dizzy spells, and the hundred and one ills which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steeper, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young.”

You can get these pills through any medicine dealer, or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Five Points For Britain

Has Designed, Equipped and Operated Fastest Modes Of Travel

It is certainly a most remarkable fact that at this moment the fastest aircraft in the world (the seaplane which won the Schneider Cup), the fastest craft on water (Miss England), the fastest motor car (the Golden Arrow), the fastest passenger liner (the Mauretania), and the fastest locomotive (a G. W. R. Express), are British all five—British designed, equipped, and operated. We are glad that the British government's exhibit at the Toronto National Exhibition this year will show five models to remind the world of it.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: “I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach.”

“I purchased a bottle of Dr. Fowles' Wild Strawberry Laxative and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since.”

“I cannot praise too highly, and will never be without a bottle of it in the house.”

“It is pleasant to take and acts very quickly.”

“My brother had the same experience with it as I had.”

“Dr. Fowles' has been on the market for the past 34 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Millburn Co., Ltd., Toronto, Ont.”

Wheat Pool Elevators

When the three provincial units of the Canadian Wheat Pool have completed their 1929 building programme they will be operating a combined total of 1,608 country elevators with a capacity of from 30,000 to 45,000 bushels each. Of this number 1,055 will be in Saskatchewan, 390 in Alberta, and 163 in Manitoba.

For sunburn—apply Minard's Lintment.

It is complained that many business men write illegibly. A really busy man, of course, has not time to be constantly consulting a dictionary.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Gravel Worm Exterminator.

MADE IN THE WEST

Paulins

HARMONY CHOCOLATES

are GOOD and GOOD FOR YOU!

Buy them by the pound At Your Grocer's

Britain Has New Industry

Factory in London, England, Makes Starless Flour From Beans

A factory now completed in North London, marks the beginning of a new British industry which might well attain the importance acquired in recent years by sugar beet or even artificial silk. There flour will be made from soy beans, whose acknowledged nutritive value has now, it is claimed, been made consistent with digestibility.

The soy bean is nearly all protein and fat, and it is devoid of the starch which dyspepsia is so commonly attributed to protein. It is four times richer than the best wheat, in fat twenty times richer.

In taste it reminds one of the almond, and bread containing it keeps longer than the ordinary bread. The probability is that it will be used also, as in Austria, for biscuits and confectionery, and the making of a new kind of chocolate.

Cars For Bolsheviks

Said That Henry Ford Will Produce 900,000 Autos For Soviets

Henry Ford is to produce 100,000 cars a year for Soviet Russia under terms of a contract signed recently and made public in New York.

The contract will run for nine years and the factory will be established in Russia. Only the Ford passenger model “A” and the Ford truck model “A” will be manufactured. More trucks than passenger cars will be produced.

The factory is to be located at Nizhni Novgorod, on the Volga river, and will be completed within four years.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

New Picture Film Invented

Can Be Made Of Cloth and Is Washable

The housewife of the near future may say to her servant: “Bridget, put those photos of father in the wash and hang them on the line to dry. Be sure to iron them tomorrow, for he is coming on a visit and I want them to look nice and fresh.”

Exactly that can be done with a new kind of picture film invented by Dr. R. W. Hochstetter, head of the Hochstetter laboratories.

He is now using the invention for household purposes, but instead is applying it to produce new types of so-called motion pictures and radio transmission of sound, photos and motion pictures. Several new processes are involved.

The first is making photographic film out of cloth, so that it is washable, ironable and non-inflammable. He says that cotton, silk, linen or even paper can be used.

Along with the new film Dr. Hochstetter announces invention of a process for reflecting sound and pictures from the face of the films, instead of transmitting light through film. He also has a different method of amplification of sound, to get further away from distortion.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

Better Study Geography

The Saskatoon Star-Phoenix received a letter from the assistant editor of the National Geographic Magazine, Washington, D.C., in which reference was made throughout to “Saskatoon, British Columbia.” If all the other information published in National Geographic is equally as accurate as the above, it is no cause for wonder that the Americans picture Canada only as a land of igloos and England as a country of beer mugs and plus-fours.

Keep Minard's in the Medicine chest.

Machinery For Shearing

Hand Clippers Used In Australia Only On Pedigree Sheep

Australia's wool clip this season is estimated at about 900,000,000 lbs. from about 100,000,000 sheep. The great bulk of the shearing is done by machinery, although, in the case of pedigree sheep, hand-clippers are generally used to ensure a cleaner and more even cut. Wolsley, who invented the shearing machine, went to Australia from England in the middle of last century. He took up sheep farming soon after his arrival, and brought his first patent in 1874.

With the machine shears now in use, an average worker can cut 100 fleeces per day, and totals up to 200 are fairly common.

Ambitious Project

Plan To Pipe Gas From Alberta As Far East As Winnipeg

W. S. Herron, oil operator, announces that a plan for piping gas from Alberta to Winnipeg, serving also Regina, Moose Jaw and Saskatoon, is under consideration. He says that the cost would probably be \$50,000,000 and that eastern Canadian and N.Y. capital is interested.

After 10 Years Of Asthma Dr. J. Q. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

May Have No Thrills

Nothing is really attractive unless it has the element of risk. This makes one look to the future with melancholy. Every day things are being made safer and safer. Even aviation some day will be safe and sane. The sea is getting safer yearly. The risks of railroading are diminishing rapidly. What will our grandchildren do for their thrills?

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

The Helpful Wife

Sporting Goods Salesman—“Something in gold standard.”

Lady—“I want to see some large sized handbags, please. My husband says that if he has a large enough handbag for tomorrow he'll win the game.”

For Frost Bites and Chilblains.—Chilblains come from undue exposure to bluish and cold frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Mapping By Photography

The camera has been used by the Topographical Survey, Department of the Interior, as a means of gathering topographical data in the field for mapping purposes, for the last forty years.

Minard's Lintment for sick animals.

The amusing part of it, says the Farmer's Advocate, is that some of those city fellows who know how a farm ought to be run, plant a bag of potatoes and harvest a bushel.

6

Suggestions

Make Your Farm More Comfortable, More Livable and More Profitable with These Simple Spare-time Improvements

If you have any time on your hands here are six suggestions which will make an amazing difference in the attractiveness and efficiency of your farm.

First—Buy a supply of Gyproc Fireproof Wallboard. Then erect Gyproc partitions in your attic, changing the waste space into an additional room or two. Imagine how much more comfortable the family will be with the attic converted into a clean, inviting third story.

Second—Renovate the lower rooms by nailing Gyproc right over cracked and faded walls. You can decorate the flat, smooth Gyproc surfaces with Alabastine, paint or any other finish. And what a difference it will make to your home.

Third—Line your garage with Gyproc. Gyproc will make it fire-proof, cold resistant and a safer, more substantial home for your car.

Fourth—Gyproc your poultry house. Your flock will have better health, and year-long protection from fire, cold, heat and vermin.

Fifth—Line your grain-bins, barns, stables and other buildings with Gyproc. By doing so you will make them more valuable, fire-safe, cold resistant and 50 per cent. more beautiful for your stock to live in.

Sixth—Look about for cracked, warped or rotted walls, partitions and ceilings and repair with Gyproc. Such repairs are quick and inexpensive to make because Gyproc saws, nails and cuts so easily—saving time and labor.

GYPROC Fireproof Wallboard

DEFINES POSITION IN RESPECT TO LABOR MINISTRY

London, Eng.—Defining his attitude towards the new Labor ministry, Rt. Hon. David Lloyd George, Liberal leader, at a luncheon of the National Liberal Club said:

"We shall await with interest the forthcoming declarations of ministerial policy, but we must declare that as far as it lies in our power the mandate of the government ends when it fails to pursue a Liberal policy. The very hour the ministry decides to become a Socialistic administration, its career ends."

"The result of the election," he said, "has elevated our party to a position of responsibility for national affairs, second only to that of the government of the day. During the life-time of the present Parliament the final word in all controversial issues between the other two parties will rest with us. We must not use the power given us by the election in a paltry, fractious or pettily spirit. We must interpret our responsibility in a large and generous way, that is, in the truly Liberal sense."

"This government has been called into being, not by the verdict of the nation, nor by the decision of parliament, but on the advice of the leaders of the Tory party. It has been brought into being by Mr. Baldwin's midwifery."

"The nation has declared by a majority of five and a half millions it has no use for Socialism or the Socialist party."

"The trouble is this majority is made up almost entirely of Liberal votes and both the Tories and the Socialists are in a conspiracy to ignore the Liberals. Mr. MacDonald thanks the nation for the confidence placed in him, and even the Tory press assumes the national verdict indicated a preference for a Socialist administration. The existence of a party which has the support of 5,300,000 citizens is not taken into account by these two parties in their reckoning of the present situation or in their estimates of future prospects."

"The Liberals stand today between this country and out and out Socialism. Unconsciously the knowledge that they are there has already had its influence. Does anyone imagine this is the kind of minority you would have if the Socialists had obtained an independent majority?"

Given Object Lesson

Pilgrims, From Britain Come To Canada To Study Christian Unity

Ottawa. Pilgrims of the British Free Churches who have come to Canada to study and observe Canada's great experiment in Christian unity, church union, learned from the Prime Minister of Canada of other and even greater object lessons which this country is giving to the world.

Premier Mackenzie King in his address of welcome to the pilgrims at the Dominion Experimental Farm recently, traced briefly the history of relations between the French and English speaking citizens of Canada and stated that the great object lesson in Canada today was that people of two great religions and races could live together and work together for the common good.

Will Collect Oil Royalties

Government Will Put Regulation Into Effect Next January

Ottawa.—The regulation enabling the government to collect royalties on oil produced on Dominion Crown lands leased to private companies will be put into effect on January 1. Hon. Charles Stewart, minister of the interior, told the House in committee. The regulation which was passed some years ago, but has never been put into effect, provides that after a company has been producing oil for five years, a royalty not less than 2½ per cent, and not exceeding five per cent, of the output, or five per cent of the sales of the product of the locality at the discretion of the minister shall be collected.

Urges Muskurt Farming

Ottawa.—Steps for the development of the muskrat industry were advocated in the House of Commons by M. N. Campbell (Prog. MacKenzie). Muskurts could be raised very easily in the water in damp pieces of farm land, and government assistance by way of technical advice might be very valuable.

W. N. U. 1790

Arrange Direct Express Service From Europe

New Agreement Will Ensure Quick Despatch Of Parcels

Montreal, Que.—Arrangements have been completed between the "Compagnie Internationale Des Wagons-Lits et des Grands Express Europeens" and the Canadian Pacific Express Company for a direct express service from all European countries to Canada according to information received at Canadian Pacific express offices.

Parcels handed in at any of the offices of the Compagnie Internationale throughout Europe will be forwarded direct by the famous crack trains of that company to points where the Canadian Pacific Express maintain receiving offices, whence they will come to this country on Canadian Pacific steamers.

Sending parcels to Canada has always been a somewhat hazardous business, at any rate from remote points in Europe where no adequate local express service is in operation. By virtue of the new agreement entered into by the two companies it will now be as safe and quick as sending a parcel from one's Canadian city to another.

Found Guilty Of Murder

Woman and Male Accomplice In Quebec Sentenced To Be Hanged

Full, Que.—Philbert Lefebvre and Mrs. Mary Viua Montpelier, Que., were found guilty at the Hull assizes of the murder of the woman's husband, Zephyr Viua, by poisoning, and were sentenced by Mr. Justice L. J. Lorange, to be hanged on Friday, August 23, at the Hull jail. The jury was out only 25 minutes.

In his charge, which lasted over an hour, Judge Lorange described the poisoning as one of the most despicable of crimes. There was no doubt, he said, that the murder had been planned for months.

The confessions of the accused showed that Lefebvre had provided Mrs. Viua with strychnine knowing for what purpose she would use it. Zephyr Viua had been very poor and every winter went away to work in a shanty. During his absence Lefebvre had visited the shack.

When asked if they had anything to say why the sentence of death should not be passed upon them, both prisoners pleaded "an innocent and I ask for clemency."

New Grain Board

A Board Composed Of Younger Men To Be Appointed Soon

Ottawa.—The cabinet is now considering the appointment of a new board of grain commissioners. The members of the old board, it is understood, are to be retired, and a younger group of younger men is to take their place.

The only appointment seriously considered so far is that of a successor to Leslie Boyd, the chairman of the board, and undoubtedly, this position will be offered to Mr. Justice Turgeon, of Saskatchewan. It is thought here, however, that he will decline to accept. In this event, it is not improbable that the post will be offered to Hon. Charles Stewart, minister of the interior.

Suggests Earlier Sessions

Ottawa.—A suggestion that in future parliamentary sessions should open in November and conclude on or about the first day of May, was made in the House of Commons by William Irvine, U.F.A., Wetaskiwin. Mr. Irvine expressed the opinion that the present practice of meeting parliament in February and continuing the session until well on in the summer months was an injustice to the western members and to those from the maritime provinces.

Driflight Goes On Strike

London, Eng.—Completion of the new British driflight R-100 on schedule appeared impossible because of the failure to settle a strike of about 30 workmen. Officials at the Howden Airship Works said the strikers insisted that the dispute be settled through direct negotiations with the Union. The R-100 will be one of the largest airships in the world. It is undergoing tests next month.

No Increase For Judges

Ottawa.—Having learned that parliament would not support an increase in judges' salaries, he did not think it desirable to attempt to force such a measure through, declared Hon. Ernest Lapointe, minister of justice, in the House of Commons. When the time came, and parliament was in a mood to endorse such an increase, he would make no delay, the minister said.

Fliers Have Narrow Escape

Rescued By Canoeist When Plane Was Wrecked In Lac la Ronge

Prince Albert, Sask.—A small pontoon Moth plane of the Dominion Explorers Company, was wrecked in Lac la Ronge, and Pilot Kelly and one passenger had a narrow escape when they were rescued by a canoeist, according to reports reaching here.

The upper and lower wings of the aeroplane were wrecked and the machine damaged generally when the plane struck the water and turned over. The pilot and passenger were thrown out into the lake and were picked up by the canoeist.

King Resumes Few Duties

Is Now Able To Look After Part Of Work

London, Eng.—King George is now sufficiently well to resume many of the functions delegated by him to a council of state, but will not yet assume his full duties.

Among the duties which His Majesty will now transact will be all business connected with dominion affairs. But it was presented to His Majesty, that for the better preservation of his health, he should not for the time being resume all functions he had delegated.

MANITOBA MAY ACCEPT TERMS ON RESOURCES

Ottawa.—Terminating a political issue which has disturbed both provincial and federal politics for more than 40 years, the report of the Manitoba natural resources commission was tabled in parliament recently.

In brief, the report which consists of 46 printed pages, recommends: (1)—The payment in cash by the Dominion to Manitoba of \$4,584,212.49, as the balance due for past arrears.

(2)—The payment to Manitoba of \$562,500 annually, from now on, until the population of the province reaches 800,000.

(3)—Increase in this annual payment of \$750,000 when the population of Manitoba reaches 800,000.

(4)—Finally, when the population attains the figure of 1,200,000 an increase in the amount payable annually to Manitoba to \$1,125,000. This amount is to remain unchanged thereafter.

(5)—The wiping out hereafter of an amount of \$135,492.82 which has been deducted annually from the subsidy, being the interest on the monies received by the province from the sale of swamp lands, when these lands were under provincial control, and the capital sum set as the value of the 150,000 acres of land granted as an endowment to the University of Manitoba. Hereafter, this sum will not be deducted from the subsidy.

It is understood here that both the province and the Dominion have agreed to accept the recommendations of the commission, and that legislation implementing these recommendations will be introduced in parliament early in the season of 1930.

The probable effect of the report on the natural resources question in the province of Saskatchewan and Alberta was being canvassed here by the members of parliament. In regard to the payment of the subsidies with statutory increases in perpetuity, it was considered that the report would greatly assist the other two provinces to obtain such a settlement.

IN BRACKEN CABINET

Hon. W. R. Clubb, who resigned from Bracken cabinet, Manitoba, during Seven Sisters probe, has been reappointed minister of public works.

Sends Farewell Message

Stanley Baldwin and Premier King Exchange Greetings

Ottawa.—A farewell message which Premier Stanley Baldwin sent to Premier Mackenzie King, on the day of Mr. Baldwin's resignation, and Mr. King's reply, were made public here. It was explained that publication of the telegram was delayed until the prime minister's office had ascertained definitely that Mr. Baldwin's message was not intended as a purely personal communication.

Mr. Baldwin, under date of June 4th, said: "I have today tendered my resignation to the King. On leaving office I should like to send you a message of farewell and sincere good wishes. It has been a great privilege to work in collaboration with you, and I wish to express my warmest thanks for your helpful co-operation during the last four and a half years, in all matters of common concern."

Mr. King replied: "Your telegram, June 4th, May I express my deep appreciation of your message of farewell and good wishes. Throughout your tenure of office the most cordial relations have been maintained between His Majesty's governments in the United Kingdom and in Canada. It will always remain a source of deep gratification that I have been privileged to be associated with you in the many important matters of common interest that have marked these years."

Bisley Team Sails

Members From Canada Have Left For Southampton

Montreal.—Canada's 1929 Bisley team was given an enthusiastic send-off on board the Canadian Pacific liner "Montrose" on which the team has commenced its voyage to Southampton.

Members of the team include Captain W. C. Colquhoun, Esq., M.C.; Sgt. J. H. Regan, Victoria; Lieut. D. Fyvie, Canadian Scottish; Victoria; Lieut.-Col. R. M. Blair, Vancouver; Master Gunner S. Colquhoun, Esq., Montreal.

Lieut. Desmond Burke, Ottawa, a former winner of the King's Prize, will join the team in England.

Newspaper Man Promoted

Calgary, Alta.—W. J. Watson, who has been secretary-treasurer and also a director of the Calgary Herald since it passed into the present ownership in 1908, is leaving Calgary at the end of the month to take the position of assistant to the president of the Southern Publishing Company at the head office in Montreal.

Eighteen "Count 'em", in One Family

The Clan MacLean arrived in Canada recently by the Canadian Pacific liner "Metagama"—at least if it wasn't the whole clan, it seemed like a large proportion. Donald, his brother Kenneth, and his son Allan were leaders of the family groups under Donald's command. Including grand-children the party, which is found a place for Centreville, Ont., numbers twenty-four ranging in age from forty-five years to six months. They had twenty-one pieces of baggage weighing 3,000 pounds.

Attacks Lloyd George

Former Chief Whip Of Liberal Party Criticizes Methods Of Leader

London, Eng.—A lively attack on Rt. Hon. David Lloyd George, Liberal leader, is made in a letter to The Times by Vivian Phillips, former chief whip of the Liberal party. He says many Liberal candidates with whom he has talked since the election are of the opinion that Mr. Lloyd George is not an asset but a positive liability to the Liberal party.

"Only courage will save the party now," he writes. "Courage to turn back on the shams and pretences of the past two years and make a new beginning under new leadership which will inspire public confidence and trust."

"If it will break loose from the degrading bondage of the party funds, if it will follow character rather than cleverness, if it will set honor and principle once again in the place which they have held in the days of its former greatness, it may yet be preserved to wield its official authority in the state and be an instrument of beneficent service to this nation and the world."

May Visit U.S. In July

Premier Ramsay MacDonald To Make Goodwill Visit This Summer

London, Eng.—Premier Ramsay MacDonald will pay his contemplated visit to the United States as soon as parliament has risen at the end of July, unless an adverse reason should suddenly intervene, it was generally held in authoritative quarters here. Departure at this time would leave him free for his projected visit in September to the League of Nations assembly meeting at Geneva.

The understanding is Premier Mackenzie King would represent Canada if such an Anglo-American conference is held at Washington.

"I cannot make a statement of any kind tonight," Mr. MacDonald declared as he was leaving London with his daughter, Isobel, for his home in Lloismouth.

The premier explained he was going to Lloismouth in search of rest and he expected to return here before the opening of parliament, on June 23.

Sapiro To Visit West

Will Conduct Speaking Tour In Saskatchewan This Month

Saskatoon, Sask.—In the interests of the Wheat Pool and under the auspices of the United Farmers of Canada, Saskatchewan section, Aaron Sapiro will conduct a speaking tour of Saskatchewan during the latter part of June.

Mr. Sapiro will reach here on June 26 and speak here that evening. June 27 he will speak at Weyburn. The date for his visit to Moose Jaw is not definitely set yet, but will be either June 28 or July 2. If he does not speak in Moose Jaw on June 28, he will probably visit Regina on that day. On June 29 he will be at Swift Current, and July 1 at Kerrobert.

ROYAL GRAIN COMMISSION TO CARRY ON WORK

Lethbridge.—The immediate program of the Saskatchewan Royal Grain Commission will not be affected in any way by the political crisis in Saskatchewan, and even should the government of Premier James G. Gardiner, which appointed the commissioners, resign within the next week or two, no anticipation of curtailment of the inquiry is feared.

This was the belief made known by Chief Justice Brown, commission chairman, when the body held sessions in Lethbridge.

The inquiry in Alberta will be concluded with a session at Medicine Hat. The commissioners then expect to enjoy a week's vacation before visiting four or five rural points in Manitoba, holding a brief session in Winnipeg and a two-weeks' probe at Port Arthur and Fort William. If any changes in this program are made they will be announced by whatever government is in power in Saskatchewan, Chief Justice Brown stated.

Complaints of car distribution, shortage of cars during the rush season, and leakages, were lodged before the commission. John Maynard, superintendent of the Ellison Milling Company here, recommended a plan for Centerville at each railway division point to check car leakages.

CANADA ACCORDS FAIR TREATMENT TO COMMUNISTS

Ottawa.—If there is any instance of a Communist having been unfairly treated, Hon. Ernest Lapointe, minister of justice, would like to hear it. This was what the minister told J. S. Woodsworth (Labors, Winnipeg North Centre), in the House of Commons when the estimates of \$3,640,725.25 for the Royal Canadian Mounted Police were under review.

Mr. Woodsworth had declared that the Communists were a political party, but information regarding their activities was being withheld from members of other political organizations. He charged that the government resorted to methods of sending spies to become members of the Communist party and incite to disorders. This was a questionable practice. The Communists were regarded by the government as a sort of house man to be trotted out for reactionary elements of the community.

Mr. Lapointe declared that the function of Mounted Police was to enforce federal law. If in the course of their activities they encountered situations contrary to the peace of the country, it was their duty to report. He knew no instance of a Communist having been unfairly treated. If such a case existed, he would be glad to hear it. The item carried.

Minorities Trust Canada

Dominion Will Keep Harvest Of Goodwill Says Hon. Philippe Roy

Victoria.—"Those masses of population are already looking to Canada as a strong advocate and a stout protector of their interests," Hon. Philippe Roy, Canadian minister to France, said in an interview here regarding the minority populations of Europe whose problems are now being considered by a special committee of the League of Nations.

"It must not be forgotten by Canadians," Mr. Roy said, "that there are 40,000,000 souls living in those European minorities. It is going to be a wonderful thing in a few years when Canada reaps the harvest of goodwill which will be the result of the announcement of Premier Mackenzie King, aligning Canada in support of the interests of the minority peoples."

Turning to reparations, Mr. Roy said that the settlement of the war indemnities in Europe was the greatest forward step achieved by the nations since the armistice.

Chinese Cured Of Leprosy

Treatment Carried On For Nine Years Was Successful

Victoria, B.C.—Smiling and happy after nine years of isolation on a small island off the Vancouver Island coast with only a few other sufferers for company, Lum Mah Hing, ex-leper, walked up the gang plank of the liner "President McKinley," a free man again, and bound home for China.

Hing had been at the lazarette for lepers on Bentinck Island, since 1920, when he was discovered working on a farm at Saanich suffering from leprosy. He responded to constant treatment of chaulmoogra oil, and when released had been completely cured.

The departure of Ling left eleven lepers still on the island. Several of them are reported to be making favorable progress towards recovery, although a few years ago, their removal would have been regarded as hopeless.

Will Hold League Conference

Madrid.—The council of the League of Nations has decided to convene a conference at Geneva on September 7, of all states adhering to the statutes of the permanent court of international justice. Among the most important matters for consideration are changes designed to permit the accession of the United States to the world court. The council also decided to call a conference in Holland during the spring of 1930 on the codification of international law.

B.C. Mineralogist Dead

Victoria, B.C.—Fleet Robertson, for twenty-three years provincial mineralogist, died recently at Everett, Wash., where he was taken ill while enroute to England via the Panama Canal route from the United States. He was born in Montreal, 1859, and was widely known in the western American mining world. He retired in 1925.

Former Coleman Girl Is Distinguished Musician

Margaret McKean is Gifted Student of Halifax Conservatory of Music—Delights Large Audience

Many Coleman people will remember Mr. and Mrs. John McKean. Mr. McKean was treasurer of International Coal & Coke Co. Ltd. and left here about 1916 to be chief accountant of the Workmen's Compensation Board of Nova Scotia. Under the heading "A Triumph for Two Graduates at Conservatory" the Halifax Evening Mail states:

"The assembly hall of the Halifax Conservatory of Music was packed to the doors for what is thought by many to have been the finest graduation recital of which the hall has been the scene in the past five years, the graduates being Miss Margaret McKean, pianist, pupil of Mr. Dean, and Miss Florence Wood, mezzo soprano, pupil of Mrs. Ernest Hees, two of the most gifted students of piano and voice respectively who ever entered the Conservatory. As a matter of fact so large was the attendance that after every available bit of room in the hall had been utilized a large number could not gain admittance, and they gladly took their seats in the entrance hall rather than forego the program. As it proved, the program was well worth some sacrifice of personal comfort."

NOTES AND COMMENTS

Speaking at the banquet to the Calgary good will party at Blair more last week, Mayor Osborne, replying to the address of Chairman Lance Morgan, stated that the smaller towns should make themselves known the same as the larger places do. He was referring particularly to the remarks of the chairman that Calgary should purchase more from the towns of the Crow's Nest Pass than they at present do. In somewhat humorous vein the visiting mayor stated that the merits of the coal of the Crow's Nest Pass should be more forcefully emphasized in the city of Calgary, then probably more of it would be sold.

In plain words, it is advertising which is required of our resources. We call to mind that old Biblical saying of "Let your light shine forth before the world," which is modern day parlance means advertising and lots of it. The shy, shrinking individual never cuts much of a figure anywhere, neither does the town which does not make an effort to interest industry and capital in the development of its resources. To keep up in the front rank of progress constant effort is required, and it applies to every individual business man.

In an editorial in the monthly magazine published by Canadian National Railways are some pertinent remarks on "Thrift."

"Economy is apt to be regarded with something akin to scorn. To be lavish is to be generous, to be careful is to be evince a mean disposition; but to be open handed when one cannot afford to be open handed is recklessness, thoughtlessness, and indicates a lack of moral balance. There are so many haphazard people in this world who have no foresight. They are irresponsible, careless of the morrow or what it may bring, their motto is live for today "and after that the deluge," from these are recruited the wastrels, the parasites, and those who look to the community for help.

"What are the causes of extravagance? They are just the ordinary things with which weak human nature is afflicted; such as fashion, that great conqueror who drags after his triumphal car so many protesting but voluntary victims. Another cause is the lack of independence, we allow ourselves to be victimized by show. Others have certain advantages, therefore, we must rise one niche higher than we can afford to occupy, to our mental inconvenience and our domestic discomfort."

A contract has been awarded for the painting of the three cottage schools and the caretaker's house. A store front on Main street has received a fresh coat of paint. Let the good work continue, and people will gain a better impression of the town and not at first glimpses carry away the impression that it is but a town of shacks. One gentleman, who paused long enough to have a look around, after having passed through here several times, remarked that he always thought it a place to just pass through as quickly as possible. More freshly painted buildings will do a lot to dispel this impression among the hundreds who pass through the town.

Premier Gardiner of Saskatchewan has decided to fight to the last ditch, kind of going down with all sails set and colors flying. That will at least ensure him front page newspaper space.

Where will your family live?

One hundred average men (statisticians have found) at death, leave their families in the following condition:—

Wealth	1
Comfort	2
Little	15
Nothing (or less than nothing)	82

In which class are you leaving yours? You are deciding now.

In the Sun Life Assurance Company of Canada, it will cost only \$150 per year to guarantee your family \$10,000 at your death, on a fifteen year average basis at Sun Life present results.

Isn't it worth \$150 to know that their comfort is assured?

ALBERTA

England in the 15th Century

Two hundred years earlier, in the 15th Century, England established the art of brewing commercially. It was at this time the water of Burton on Trent began to be famous. The monks were the first to discover the secret of these famous waters.

There is a document, dated 1460, in which it is stated that Matilda, daughter of Nicholas de Thoben, had released to the Abbot of Burton certain tenements. In return she was granted daily for life, two loaves, two gallons of beer and one penny, besides seven gallons of beer for the men.

Today malt beverages, BEER — ALE — STOUT are considered Health Drinks.

"Where BEER has once been introduced, it has generally become the national beverage."

Calgary Stampede July 8th to 13th

The deep throated roar of encouragement from a crowded grand stand, sweet music to the ears of the scores of cowboys who daily risk life and limb during the championship cowboy contests, will ring out with renewed vigor again this year, when the annual Calgary Exhibition and Stampede, where \$70,000 in prizes and purses are offered, is held at Victoria Park during the week of July 8 to July 13, inclusive.

With the greatest list of purses and trophies ever offered for a frontier contest, Canadian and American cowboys are keeping their saddles and working up their ropes in preparation for the big western celebration, and even at this early date, the biggest entry of cowboy contestants in the history of the Stampede is expected.

Agricultural Alberta is preparing for the Stampede and Exhibition in totally different ways. In the ranching districts, the cowboys are rounding up the "best" or the "worst" of the outlaw horses, for only "top" mounts are shipped in for the big contestants, while in the farming districts, purebred cattle, horses, sheep, swine and poultry are being fitted up for display in the various show rings. The exhibition of purebred livestock is a big part of the Exhibition and Stampede, and the cattle pavilion, the largest and most modern in Western Canada, will be filled to capacity this year.

In addition to regular prize-festivals, special prizes will be awarded for Alberta bred cattle and not only will all Alberta bred be eligible to compete for these prizes, but they will also be eligible for all open classes.

Here and There

(329)
More than 1200 employees will comprise the personnel of the Royal York Hotel when the Empire's greatest hospitality throws open its doors to the public in June. The chef has between 125 and 175 skilled culinary experts under his control and the head-water commands a group of over 900 workers. There is a corps of 28 picked telephone operators and there is a printing establishment with three presses and a linotype machine.

With a score of 1402 out of a possible 1500, highest ever made since the contest was inaugurated, Canadian Pacific Railway police, Ontario No. 1 team have been awarded the Dominion Revolver championship for the Chief Constables Association Trophy. Thirty-six teams competed for the title. The winning team was made up of Investigator E. O'Brien, Sudbury; Constables H. H. Gyves, Port McNicoll; J. H. B. MacDonald, Toronto; D. Prndergast, Sudbury; and W. E. Tingman, White River, Ont.

Addressing the Quebec branch, Canadian Manufacturers Association annual meeting in Montreal recently, Henri Rolland, retiring chairman, said Canada had the second largest per capita installation of water power in the world with its 512,000 h.p. per thousand of the population, being second only to Norway. Today \$900,000,000 or \$100 for every person is invested in hydro-power plants and there will shortly be another \$200,000,000 added by numerous undertakings now in their initial stage.

Fine progress is being made in seedling in the Prairie Provinces, according to reports to the agricultural department of the Canadian Pacific Railway at Winnipeg. Lost time due to backward weather is now made up. It is claimed, the soil being in excellent condition. Pastures are somewhat backward but stock are in good shape.

Under its policy of development and expansion the Canadian Pacific Railway has already this season let contracts for 286 miles of branch line construction in western Canada, according to D. C. Coleman, vice-president of western lines. It is expected that when contracts for the Langtan-Prince Albert branch are let that construction programs for 1929 will call for slightly more than 400 miles.

Hon. Narcisse Perreault, former Lieutenant-Governor of the Province of Quebec, returned from a six months trip to India and the East recently. His Honor was taken ill with bronchial pneumonia when in Benares and for a time his condition was very serious. When he was released from the Trans-Canada Limited at Montreal from Vancouver he was however looking well and stated that but for his illness had thoroughly enjoyed his holiday. It was his first visit to India and he was much impressed by the scenes witnessed there.

WORLD HAPPENINGS
BRIEFLY TOLD

Newfoundland's recently authorized \$6,000,000 five per cent. loan was awarded to the Bank of Montreal on a bid of 98.25. The government regarded the terms as favorable.

Prince Charles, second son of King Albert, was fined 100 francs (about \$4), for not voting in the Belgian provincial election in accordance with Belgian law.

Caught between a conveyor and a miter in the Flin Flin mine plant, Jacob Holt was dragged to his death. His clothing became caught in the bucket carrying debris when he was working about the machine.

Some early moves looking to reduction of international naval armament are confidently expected in informed circles at Washington, to be made by the United States and Great Britain.

The Ontario Government's agreement with the Federal government on old age pensions was formally signed by Premier G. Howard Ferguson, and Hon. Peter Heenan, federal minister of labor. The act becomes operative November 1.

One of the largest diamonds found in the South African fields was recently brought to Kimberley from Barkley West, for valuation. It weighed thirty-three and one quarter carats and sold for \$13,300. This is believed to be a record price per carat—\$400.

Baking tests of Garnet wheat, shortly are to be carried out in the United Kingdom, and will be observed by L. H. Newman, Dominion cerealist, who leaves from Montreal, on the Montrose. Mr. Newman may also go to Hamburg and other European grain markets.

Channel Tunnel Plan Favored

Would Help To Solve Unemployment Problem in Britain

Construction of a tunnel under the English Channel to connect England and France by rail is one of the schemes which R. Hon. J. H. Thomas has his eye on in connection with his plans to solve the British unemployment problem. Mr. Thomas has been delegated by the new premier, R. Hon. J. Ramsay MacDonald, to direct the new Labor government's work in dealing with the unemployment situation.

He is organizing a new government department of employment and is obtaining reports on a number of projects which might supply work for some of the men now unemployed as a preliminary to calling in experts from all the government departments.

With the aid of the experts he hopes to frame definite plans for road-building, housing development and railway reconstruction. At the same time he is not to forget emigration and the development of the Empire and the part they may be made to play in reducing the army of unemployed.

Products Of Canada's Farms

The four leading items in the total agricultural production of Canada in 1928, valued in all at \$1,730,304,000 are: Field crops, \$1,098,781,000; dairy products, \$250,000,000; farm animals, \$197,880,000; and poultry and eggs, \$106,654,000. Last year was the first year for poultry and eggs to exceed \$100,000,000 in value. Since 1923 there has been an increase in value from \$52,000,000. Value of farm animals in five years has advanced \$72,000,000.

Most Obedient

Mamma: "And were you a nice boy at the party?"

Bobby: "Yes mamma."

Mamma: "You didn't ask twice for anything at the table, did you?"

Bobby: "No, I didn't, I asked once, and they didn't hear me, so I just helped myself."

"What has happened to you? Shall I take you home to your wife?"

"Thanks. I have just come from there."—Buen Humor, Madrid.

W. N. U. 1790

A Forest Of 2,000 B.C.

Ancient Douglas Fir Standing At Bottom Of Lake In Oregon

An unexplored wilderness of Douglas fir trees stands upright on the bottom of Clear Lake, in Linn County, Oregon—probably green and flourishing in 2,000 B.C. These firs, we are told by John D. Guthrie, writing in *American Forests* (Washington), were growing in a little valley high up in the Cascade Range, when, about 2,000 B.C., or before, there were eruptions from many peaks along the crest. The peaks belched forth lava, and the molten stream spread out over thousands of acres. A tongue of this flow must have run into the little valley of the McKenzie, and almost filled it. Then:

"The heat may have killed the Douglas firs in the valley, or they may have been literally drowned by the rising waters. In any case, the river gradually filled the little valley above the lava dam, submerging the fir trees, and formed a lake about a mile long.

"The Douglas fir trees are still standing at the bottom of the lake. The waters are the coldest of any of the Cascade's lakes, and crystal-blue, so that the bottom, shining white with the volcanic ash of long ago, seems but a few feet below you. With the air excluded, these old trees have been perfectly preserved through all these centuries, and to-day the wood is readily identified. It is as sound as ever, with no breaking down of the woody tissues whatever, nor any evidence of imminution at any kind."—Literary Digest.

To Protect Civilians

International Red Cross Commission Will Start World-Wide Propaganda

A world-wide campaign for the protection of civil populations against the future possibilities of aerial and chemical warfare is to be inaugurated soon by the International Red Cross Commission. The movement will take two forms—world-wide propaganda to acquaint civil populations with the dangers of aerial and chemical warfare and world-wide competitions for the perfection of new means of defense against such attacks.

Winnipeg Newspaper Union

SLENDER TYPE

You'll be attracted by its simple sophisticated lines, with a V-neckline and lower edge of bodice at waistline shifted with bow trimming. It adapts itself beautifully to the season's newest fabrics in printed silk crepe, plain silk crepe, printed rajah, crepe satin, crepe de chine, rayon printed voile, handkerchief linen, printed pique, gingham check in cotton or silk crepe, georgette crepe, and cotton-faille crepe. Style No. 462 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust. It is made with 1 1/2 yards of 36-inch material with 1 yard of 36-inch contrasting in the 36-inch size. Just two major parts to pattern, which means practically only ride and shoulder seams to join. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including dressmaking and cute designs for the kiddies.

RIGHT HON. RAMSAY MACDONALD
Leader of the Labor Party and Premier of Great Britain.

Recipes For This Week

(By Betty Barclay)

OATMEAL DROP CAKES

3/4 cup butter.
1 cup sugar.
2 eggs.
1/2 cup milk.
2 cups rolled oats.
2 1/2 cups flour.
1 teaspoon baking powder.
1/2 teaspoon salt.
1 teaspoon cinnamon.
1 teaspoon nutmeg.
1 cup chopped seed raisins.
Cream butter, add sugar, eggs well beaten, milk and rolled oats. Mix and sift dry ingredients. Add flour mixture to first mixture, thoroughly mix. Drop by spoonfuls on a greased baking pan and bake in a rather hot oven. This makes 32 to 36 cookies.

NEW YORK SALAD

4 slices pineapple.
1/2 cup celery.
1/2 cup nuts chopped.
2 oranges.
Cream mayonnaise.
Lettuce.

Arrange slices of pineapple on nests of lettuce leaves. Cut celery in slender strips, one and one-half inches long, and mix with nut meats. Pile in centre of pineapple, and garnish with four sections of orange, free from membrane, laid symmetrically on pineapple. Pass dressing separately.

"Talkie" Novels Now

People Can Enjoy Book Without Trouble Of Reading It

Talkie novels have come as the natural sequence to talkie movies. The first talkie novel is a story "Arabian" by Andre Cayatte, and has been put up in a series of phonograph records, each record containing a chapter. The story is related by the author.

Several others are in preparation, but the plan has been changed by using men and women to recite the lines of the characters of the novel, to do away with "says she" and "says he."

Editors of the talkie novels predict a great future, principally because it will now be possible to enjoy a book without even the effort of turning every page.

New York Are Common

Americans may believe there is only one New York, but England has three and Scotland one. England recently claimed a New York in Kent, Lincolnshire and Northampton counties and immediately all good Scotchmen pointed to their New York on the western shores of Loch Awe.

Offered High Position

Clarence Chamberlain, trans-Atlantic flyer, wants a young woman secretary who will do her stenographic stuff in the air. He is willing to "iron out" the bumps and make the work as pleasant as possible. His frequent and long-distance flights, he says, necessitates the engagement of an air secretary.

SUNDAY SCHOOL LESSON

JUNE 23

PSALM OF PRAISE

Golden Text: "Bless Jehovah, O my soul."—Psalm 103:1.

Lesson: Psalm 103:1-22.
Devotional Reading: Psalm 107:23-31.

Explanations and Comments

Gratitude and Praise For God's Mercies, verses 1-5. "Bless Jehovah, O my soul"; thus the Psalmist addresses himself. "The Semitic languages have no word for 'self'. If the Syrian has to render 'a kingdom divided against itself', it says 'a kingdom divided against its soul'. If it needs say 'your soul'. And all that is within me—my whole self, my whole being, all my faculties and powers—bless His holy name. As we have often noted, 'name' stands for person; bless Him who is holy.

"It takes all there is of a man to praise and worship God adequately. Half-hearted praise is quite as much out of place as half-hearted devotion to one's family or country."

Bless Jehovah, O my soul, and forget not all his benefits. Forget none of them: take none of them for granted. How often is forgetfulness the cause of ingratitude!

"I believe thanksgiving to be a greater mark of holiness than any other part of worship."—McLeod.

In the two clauses of verse 3 and the first clause of verse 4, Professor Drummond notes in the last part of each, three facts of ministry—the guilt of sin, the stain of sin, and the power of sin; and in the first part of each, three facts of salvation—forgiveness, healing, and redemption. Who forgetteth all thine iniquities, thy crookedness, thy sin! Who healeth all thy diseases.

"Is not the recuperative power of nature God's own healing touch? Had He not endowed our bodies with that which restores them from accident and sickness, no bone would ever set, no wound ever close, no patient ever recover. And so it is with the deeper maladies of the soul."—W. L. Watkinson.

Who redeemeth thy life (thyself), from destruction. Destruction, or the Hebrew Version, "It stands for Sheol, which is here pictured as claiming the Psalmist when on the point of dying; but Jehovah paid, as it were, the ransom and so brought him back to health and life. 'Redeem' or 'ransom' is here used figuratively."—T. W. Doolittle. Who crowneth thee with lovingkindness and tender mercies.

Goodness is not like the barometer—sometimes high, sometimes low, sometimes doubtful. It is the constant quality on which we can ever rely.

Who satisfieth thy desire with good things, so that thy youth is renewed like the eagle. "Make thee young and lusty as an eagle."—Coverdale. The eagle is selected as "the liveliest image of strength and vigor." "Preparations who are provided for after this royal fashion, preserve their brightness and youthfulness. They moulth the ageing influences of the years, and every day God imparts a new freshness to their lives."—Thomas Phillips. Compare Isaiah 40:31.

"I believe that God forgives all my iniquities, heals all my diseases, redeems my life from destruction, crowns me with lovingkindness and tender mercies, and fills my years with good so that my youth is renewed like the eagle, not because I read the story of this experience in the Psalms, but because I experience it in my own life; but perhaps I should never have experienced it if my own life if I had not first read it in the Psalms."—Lyman Abbott.

Opportunity for
British Traders

Canada Offers Good Market For Empire Made Goods

The great bulk of Canadian imports come from the United States, a nation which has pursued a consistently selfish, if not hostile tariff course toward this country. Sentiment in Canada is strongly in favor of the purchase of British goods rather than American. The opportunity is here for British traders to capitalize on this sentiment. To do so, they must take a leap out of the American's book. They must send representatives here to get into close touch with Canadian conditions and market requirements. More vigorous merchandising methods are essential. The appointment of an agent in Montreal or Toronto to look after the entire Canadian market is an obsolete arrangement. There must be more vigorous commercial penetration and the results will justify the cost.—Calgary Herald.

Phosphates For Fertilizers

Manufacture Of Fertilizers On A Large Scale To Be Carried On In B.C.

The vast deposits of phosphates in British Columbia, to be converted into fertilizer by the Consolidated Mining and Smelting Company, will save the "wheat sick" parts of the grain belt in Western Canada, said C. C. Castle, of Victoria, formerly member of the Canadian Grain Commission, the other day. "The ally," he said, "The manufacture of fertilizer on a large scale, says, the greatest advantage the western provinces have ever known. It will cause an increased yield; an earlier harvest, closer stentment and bring a reduction of taxation."

A Large Order

Mrs. Highty-Tighty: "And these are all the vacuum cleaners you have?"

Dealer: "Yes, madam, I have shown you all we carry."

Mrs. Highty-Tighty: "Well, I'm afraid they won't suit. I want one from the Louis XV. period to match my antiques."

"Nurse," said an amorous patient, "I'm in love with you. I don't want to get well."

"Cheer up, you won't," she assured him. "The doctor's in love with me, too, and he saw you kiss me this morning."

Bill: "Who was your wife quarrelling last night?"

Albert: "Oh—er—she was scolding the dog."

Bill: "Poor beast—I heard her threaten to take the front door key away from him."

A lot of people would have fewer troubles if they would think less about the injustices of life and work more.

WINDOLITE The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light let through windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness weighs about 135 to 120 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

The Desert Song

— BY —
VIRGINIA MORRIS
Copyright 1929 Warner Bros. Pictures, Inc.

"The Desert Song" is a Warner Bros. production of this novel. It is based upon the story by Otto Hirsch, Lawrence Schwab, Oscar Hammerstein, 2nd, and Frank Mandel.

CHAPTER V.—Continued.

An hour later the Red Shadow received from his host the advice that the French girl was alone in the upper chamber. He found this room to be a gorgeous apartment lighted by great oriental lamps, the walls were of gold and suffused a weird effect. Margot was sitting on a low silk couch. Her dusty riding habit had been exchanged for a flimsy chiffon skirt that revealed every line of her alluring body. A narrow pearl bodice took the place of a waist and her bare arms were bracketed with broad bands of precious stones. She was far more beautiful in eastern garb than the Red Shadow had ever seen her before.

"Why did you bring me here?" was Margot's first question when the Red Shadow entered, she arose from the couch and stood in a defiant attitude.

"Why?" he replied. "To teach you to love me—so fiercely that you could give up home and friends. Call it a mad dream, but mad as it is I'm willing to risk my whole future to make it come true."

"Leave love out of it," she answered. "I hate you! I love Paul!" But the Red Shadow knew better. With a final positiveness, he told her, "You do not—love him! Come to me!"

His persuasiveness had not won her, for she shrank from him. "Tell me one good reason why you will not," he insisted.

"Why there . . . there are many!"

"Give me one!"

"Why I love . . . I love Pierre Birabeau. I know that I do. Once I dreamed of romance and adventure, but I've had enough of it. I want the quiet life that Pierre planned for me!"

The Red Shadow made an impulsive attempt to take her in his arms, but before he could do so the door burst open and Ali Ben Ali entered—followed by—General Birabeau!

The Sheikh motioned to them, "Believe me, I wish to prove myself a friend of the French. You see my people are innocent. He stole her."

The Riffs along with Ali Ben Ali's men, now crowded into the room. General Birabeau turned to the owner.

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and very near unto death. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicine has helped me wonderfully."—Mrs. Wm. H. BRECHTELLEN, Box 145, Port Colborne, Ont.

W. N. O. 1790

shadow a prisoner in captivity. He is not to be brought in alive!"

Fontaine smiled but Margot jumped to her feet and exclaimed, "But the man you're after is alone and unarmed! You cannot be towards enough to kill him!"

"Go, Paul, you have heard my orders!" insisted the General. But he was not devoid of sympathy for the girl, for as his subordinate left, he turned to her: "Margot, I advise you to give up this dream of romance. It has caused you enough heartache."

Thinking it was kinder to leave her alone, he disappeared silently to the garden. The girl resumed her vigil, scanning the desert spaces she knew not for what. Afternoon darkened to dusk and dusk darkened to evening. Then, out of the stillness, cries of the returning soldiers were heard. A moment later Captain Fontaine burst into the room and the instant that Margot saw his face she knew that his mission had been successful. He was followed by General Birabeau, who asked, "Tell me what happened?"

"We killed him!"

"Which one of the soldiers?" the commandant enquired.

Paul Fontaine hesitated. "None of our soldiers. But the last man you would ever suspect."

The door opened and Pierre Birabeau stood before them. Over his arm was the cloak and the mask of the Red Shadow and his hand held the outlaw's broken sword. Gradually his father realized the daring of the son he had almost despised. It was he who had killed the dreaded enemy. In a rush of emotion he put his arms around the boy and held him close. Then another realization slowly possessed him, for he whispered so that only Pierre could hear, "You were bravest when you refused to fight!"

That evening Pierre Birabeau was the acknowledged hero of the post. Margot alone failed to congratulate him. The General, bursting with pride, at the bravery of his own boy, urged him to tell the girl the details of his amazing exploit. As he left the room he saw Pierre put his arm around Margot Bonvalet—and he had never dated that before!

"Please, Pierre—don't tell me anything more. I—I want to be left alone!"

"But answer just one question, Margot, and then I will go. Did you love this man very much?"

"Yes, I loved him—as I never will love anyone else."

Pierre did as he had promised. He went quietly from the room. When she knew that she was alone Margot gave way to all the despair that had been stifled in her since the night before, when she started back over the desert, leaving the Red Shadow to face the horrible punishment he could not escape. Her own soba prevented her hearing the door through which Pierre went open again.

At first it seemed impossible of her broken heart. But when she felt his lips against hers she knew that it was true. The Red Shadow—her lover—was there, dressed in his scarlet uniform, his face hidden by the mask he had always worn.

Then, after that long embrace, she lifted the mask. And she knew that the greatest romance of all was ahead—the tempestuous love of the Red Shadow and the protecting tenderness of Pierre.

THE END

Had No Moving Problems

Family Pays Rent Fifty-Nine Years On Same House

For one family to pay rent of one house for a period of fifty-nine years is a pretty good record, and that is the record revealed by the announcement that Fred R. Allen, 59, of Farmington, Me., is going to move for the first time.

He is living in a house where his father began paying rent, and Fred was born, and after the death of his parents he continued to live there. The house is to be torn down, and so Mr. Allen has to move.

The Mediterranean has very slight tides, at most places only a few inches.

The Home Of Porcelain

Saxony Town 500 Years Old Is Planning Celebration

Meissen, a beautiful town in Saxony, one of the first places in Europe, if not the first, where porcelain was manufactured, is 500 years old this year. All kinds of celebrations have been planned for this anniversary, among them chimes of real porcelain bells, the first of the kind in the world, to be hung in a Meissen belfry. But the most remarkable commemoration is a war memorial chapel of porcelain. The whole interior has been lined with porcelain, and large commemorative groups have been fashioned in china, clay, colored and baked to decorate the interior. The man who first made "Dresden China" was named Böttcher.

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, healthy baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers and happy mothers because they have found the way to keep their little ones well—or if sickness does come to suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health. Sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Newspapers Best Medium

More Money Spent On Newspapers Advertising Than In Any Other Way

One billion five hundred million dollars was spent on advertising in the United States during 1927, according to a survey made by the National Bureau of Economic Research at Washington. The report contains a chapter by Professor Melvin T. Copeland, of Harvard University, who points out that advertising not only stimulates buying, but acts as a stabilizing influence on certain industries.

That newspapers are the best medium through which advertisers may reach ultimate customers is shown by the amounts spent in the States in the year under review, for each class of advertising. Newspapers, \$300,000,000; magazines, \$210,000,000; direct advertising, \$400,000,000; street car cards, \$20,000,000; outdoor advertising, \$75,000,000; radio \$7,000,000 (since greatly increased); business papers, \$75,000,000; and premium advertising, program and directories, \$25,000,000.—Edmonton Journal.

Honey Production

Honey production in Canada in 1928, amounted to 22,489,909 pounds worth \$2,785,467, as compared with 23,196,493 pounds worth \$2,936,558 in 1927, and 13,769,649 pounds worth \$1,920,948 in 1926. A feature of recent years has been the rise of the western provinces in honey production.

We met a friend the other day whose wife had been ill with a bad cold a week or so before.

"Did your wife ever get her voice back?" inquired.

"All of it," the friend replied.

Polish Universal Exhibition

Canada Sending Valuable Exhibits Which Will Advertise This Country

Saskatchewan has contributed to the Canadian exhibit to be displayed at the Polish Universal Exhibition, being held from May to September of this year at Poznan, the University City of Poland. The Dominion Government, several other provinces, the railway companies and the Hudson's Bay Company also have contributed. Other countries participating include Great Britain, Holland, Russia, Turkey, Japan, China, United States, Brazil, Argentina, Chile, France, Italy, Germany, Belgium and Czechoslovakia.

The Canadian exhibits will illustrate this mode of living of the Polish-Canadians in city and country. The Dominion Government, apart from contributing modern exhibiting the agricultural, mineral and industrial wealth of the country, is donating a group of Canadian buffaloes. The Canadian Railway system will exhibit illustrations of the stations, shops, bridges, tunnels, irrigation projects, etc.

The Province of Saskatchewan is providing delightfully colored transparencies, complete with electrical fittings in readiness for erection, showing public buildings, including the Parliament Buildings, University, Colleges, Normal Schools, Hospitals, together with a group of sixty large photographs, uniformly mounted, providing views of Saskatchewan farming operations, scenes and livestock. To each individual photograph is attached a description written in English, French and Polish. It was interesting to find, in translating the descriptions, that no such word as "Combine" has yet found a place in the Polish language. Handsome glass containers carrying the Saskatchewan "coat-of-arms" will contain exhibits of Saskatchewan-grown wheat, oats, barley, flax and peas. The Provincial Museum has provided mounted specimens of fur and bird life to be found in the Province.

Little Helps For This Week

"He giveth power to the faint, and to them that have no might He increaseth strength."—Isaiah xl. 29.

It is not, Lord, that I have fearful grown
To walk the way I must;
But that the path is steep that I must tread.
And often in the dust."

I fall, my feet are bleeding from the stones.
And all my tears are vain;
Forgive, I pray, dear Lord, and give me strength;
Thy strength to rise again.

Whether we stumble, or whether we fall, we must only think of rising again and going on in our course. God never makes us feel our weakness, but that we may be led to seek strength from Him.—Fenelon.

It is impossible for that man to despair who remembers that his Helper is omnipotent.—Jeremy Taylor.

Wellington, N.Z., is constructing a war memorial which will have a carillon.

Use Minard's for the rub down.

Another pathetic little feature of everyday life in the way people will look forward for years to the nice things they are going to do when the children are grown up and away, and then find, when the time comes, that they don't care much about doing them after all.—Ohio State Journal.

ROLAND CRAYFORD

During the illness of the Rev. A. D. Currie, services at Blairmore and Coleman were conducted by Archdeacon Swanson of Lethbridge on June 9, and on Sunday last by Mr. Wade, principal of Commercial High School, Lethbridge, and who is a licensed lay reader under dispensation from Archbishop Matheson. It is likely that next Sunday's services will be taken by Mr. Currie, with service at St. Alban's at 7 p. m.

Help to make your town a place to be proud of by taking part in activities for community welfare and progress. A visitor of the Calgary Board of Trade, stated that no man should remain outside of the board in his town, for if he expected to derive the benefits that may accrue from its work, he should be ready to shoulder a share of the work and responsibility. Jump in and say you are glad to help when asked to co-operate in Board of Trade work. In other words, show that you are out to "play the game."

Here and There

(328)

Music bath charms to soothe the savage breast, and jazz has now exercised its well-known effect on animals, since the deer at Banff have been listening to the duce strains from the orchestra at the Banff Springs Hotel. Three male deer were seen the other night listening with astonished ears to the symphony within. Both deer and elk are unusually tame this season and are going about with cameras in lieu of firearms.

Aviation is coming into its own in Canada and Canadians are becoming thoroughly air-minded. Three airports were opened early in June at Ottawa, Kingston, and Hamilton, at which a great assemblage of planes took place and large crowds witnessed the proceedings. Many took advantage of the opportunity to send mail and parcels by air express during these functions and the Canadian Pacific Express Company used the planes to advantage.

Richard Barthelmess, moving picture star, accompanied by his bride, made a three-day honeymoon stay at Banff Springs Hotel early in June. He says he will be back in the Fall to get some big game hunting in the Canadian Rockies.

Dock dues on parcels from Cherbourg are now lifted under an order from the French Government and there will be consequently a great increase in despatch of these parcels from France to Canada, according to word recently received by the Canadian Pacific Express Company. Prior to this, parcels from France had to be shipped from Southampton causing a loss of a couple of days' time in reaching Canada.

CLASSIFIED ADVERTISEMENTS

"First Woman in Oil"

Mrs. Roelva Van Mentz, of Johannesburg, South Africa, described by the British press as "the world's first woman oil promoter." She is seen aboard the Cunard liner Albatross, arriving this summer at Montreal from England to interest herself in the oil fields of the Canadian West. Even in such a precarious business as oil, women need take no second place to men, she thinks.
